# ORCHARD COLLECTION TOP GRAIN LEATHER

The Top Grain Leather from our Orchard Collection requires care to maintain the appearance and smooth finish. The salts and body oils that occur naturally in human skin can damage the surface of the leather if left uncleaned for lengthy periods. In warm or humid weather, it is important that the leather be wiped down weekly, particularly if the leather has become damp with perspiration or deposits of body oils are visible on upholstered areas. Keep leather away from direct sunlight, intensive heat and weather.

## Care & Maintenance:

Vacuum regularly with the soft brush attachment of the vacuum cleaner to remove dust and grit. Then wipe with a soft, color-fast cloth dampened with water. This should be done as often as necessary. Wipe excess liquid up immediately with an absorbent cloth or sponge.

### Cleaning

Clean the leather surface every 3-4 months with both leather cleaner and leather protector (follow product's application instructions). Always clean along any creases that have developed in the leather and pay particular attention to areas that come in contact with skin such as headrests, arm-pads or seat cushions. Do not use saddle soap, detergents, solvents, abrasives, unidentified leather cleaners, suede cleaners or any products containing silicon or solvents. Do not soak unnecessarily. Always avoid excessive hard rubbing. Do not dry clean or machine wash.
