BELLA ANTIQUE COLLECTION

ENGINEERED WHITE QUARTZ

WHITE QUARTZ

The engineered quartz material featured in our Bella Antique Collection is comprised of a mixture of quartz material, resin, and pigment. Much like natural stone, no two pieces are exactly alike due to variations in color, texture, luster, and veining. These differences are not defects and should be considered part of the natural beauty of the material.

Care & Maintenance:

It is strongly recommended to use coasters, place mats or trivets on the surface to prevent damage from liquids, heat, and food stains. The quartz material comes with a water-based sealant applied to the surface and although this sealant will provide some protection against water-based stains, it is highly recommended that any spills are attended to immediately. If acidic liquids (e.g. vinegar, red wine, lemon, etc.) are left sitting on the surface for more than a short period of time, blemishes will appear. For general cleaning, a damp cloth may be used to remove surface contaminants.

SPECIAL CONSIDERATION: Bella Antique Collection products are made with natural stone, antiqued metal, concrete, and reclaimed wood. These products include unavoidable variation in color, texture, uneven grain, blemishes, scratches, marks, and cracks. These features are not defects, but rather the material's natural characteristics. By ordering products from this collection, you accept the characteristics unique to each item and agree that no claims will be approved regarding these natural variations. Special care should be taken to protect the natural finishes unique to this collection.

BELLA ANTIQUE COLLECTION

RECLAIMED WOOD

All reclaimed wood finishes in our Bella Antique Collection are natural materials that feature variations in color and texture. The existence of natural knots, cracks, scratches, and marks in the surface of the wood should be expected. These visual characteristics add to the natural beauty of the material, unique to each piece. The surface of the wood is treated with a light coat of stain-resistant colorless wax.

Care & Maintenance:

Although the surface of the wood is treated with wax, it is still subject to stains if spills are left without immediately wiping. It is strongly recommended to use a place mat or coaster to protect the surface from heat over 140° F from hot pots/pans/dishes/cups to avoid burn marks. It is recommended to reapply the wax to the surface periodically with a neutral household paste wax that can be purchased at any major home improvement store. Dust the surface regularly with a clean, damp cloth. Avoid using harsh abrasives or chemicals.
