TRADITIONS COLLECTION CONCRETE

WHITE CONCRETE

The White Concrete finish from our Traditions Collection is a handcrafted concrete resin top that features an aluminum honeycomb internal structure for added strength. The top is coated in a durable two-step finish that is commonly used on automobiles, making it resistant to most spills, weather and abrasions. This process results in a variation in color, texture and density. These visual characteristics do not affect the lifespan, quality or durability of the material, but are a part of the natural beauty, unique to each piece. The concrete surface will patina over time with daily use and sun exposure, which will add to the beauty of your furniture. Avoid exposure to items of extremely high or low temperature by using placemats and coasters.

Care & Maintenance:

The surface of the concrete is subject to stains if aggressive acids (like vinegar, red wine, lemon, etc.) are spilled and left without immediate cleanup. Grease and dirt can also leave stains and can cause the surface sealer to break down.

Cleaning

The concrete surface should be cleaned with a PH-neutral soap solution and a soft cloth. Afterwards, wipe with a clean, dry soft cloth. Avoid the use of chemicals, acidic products or solvents.

Scratch Removal

Sand any small scratches that may appear with a fine grit (320) sandpaper and wipe with a wet soft cloth. The scratches will be softened and become part of the patina.

SPECIAL CONSIDERATION: The White Concrete finish from our Traditions Collection is a handcrafted natural polystone material that features variation in color, texture and density. These visual characteristics do not affect the lifespan, quality or durability of the material, but are a part of the natural beauty, unique to each piece. By ordering products from this collection, you accept the natural characteristics unique to each item and agree that no claims will be approved regarding these natural variations. Special care should be taken to protect this finish.
