Bronze Bay Collection

MARBLE

The Bianco Marble from our Bronze Bay Collection is 100% natural stone product. Each marble slab has a surface that features variation in color, veining, texture and density. The existence of minor visible natural cracks in the surface of the marble should be expected. These visual characteristics add to the natural beauty of the material, unique to each piece.

The surface of the marble is delicate and is subject to marks if aggressive acids (like vinegar, red wine, lemon, etc.) are spilled and left without immediate cleanup. To protect the marble from acid abrasion and grease stains, apply a marble sealer periodically. It is strongly recommended to use a placemat or coaster on the stone surface to protect it from heat over 140º F to avoid burn marks.

Care & Maintenance:

Clean the surface after use with a clean cloth or paper towel with a marble cleaner. Only use specifically designed cleaners for marble as common household cleaners have harsh acids or alkalis that could etch or dull the marble surface.

Scratch Removal

If slight scratches appear in frequently used areas, use a natural white wax before polishing with a small hand/floor polisher. The scratches will be softened and become part of the patina.

Stain Treatment

Use a paste made of baking soda and water for stubborn stains. For small, light stains, rubbing alcohol or hydrogen peroxide may be sufficient. Consult a professional if these methods fail.

SPECIAL CONSIDERATION: Bronze Bay Collection's Marble is a 100% natural stone product. Each marble slab has a surface that features variation in color, veining, texture and density. As such, variance from piece to piece is to be expected. The existence of minor visible natural cracks or slight blemishes in the surface of the marble should be expected. By ordering products from this collection, you accept the natural characteristics unique to each item and agree that no claims will be approved regarding these natural variations. Special care should be taken to protect the marble's finish.

Bronze Bay Collection

WOOD VENEER

The Oak and Poplar Burl Veneer finishes from our Bronze Bay Collection highlight the natural beauty and character of wood. Variations in color, grain, pattern, and texture are to be expected and may differ from piece to piece. Poplar burl veneer is especially distinctive, with naturally occurring variations that make each item unique. These natural characteristics contribute to the individual appearance of each piece.

Care & Maintenance:

The surface of the wood veneer is subject to stains if spills are left for a long time without wiping. It is strongly recommended to use a place mat or coaster on the surface to protect it from heat over 140° F to avoid burn marks. Dust the surface regularly with a clean, damp cloth. Avoid using any harsh abrasives or chemicals.

SPECIAL CONSIDERATION: Bronze Bay Collection features burl wood products crafted from natural materials. These products exhibit inevitable variations in color, texture, pattern, and shape. These variations are not defects; rather, they are natural characteristics of the materials used. By ordering products from this collection, you accept the characteristics unique to each item and agree that no claims will be approved regarding these natural variations. Special care should be taken to protect the natural finishes.
